

The BROGE V3 hybrid and carbon fibre camera pole range consists of 7 sizes, from 5-metres to 12.5-metres extended lengths. This range of camera poles provides a lightweight alternative to glass fibre equivalents, whilst retaining its strength and rigidity, remaining fully portable. The lateral clamps can be easily adjusted without the need for tools, offering a positive locking force and are ergonomically designed for left or right-handed operators.

This range includes a folding and rotating footplate on the base of the poles, providing extra stability to the poles when fully extended, especially when heavy equipment is attached to the top. The rotation of the footplate allows the operator to turn the pole a full 360 degrees making it ideal for panoramic shots to be captured.

Pole Features

- Poles are constructed from high quality composite carbon fibre, making them lightweight yet rigid when fully extended.
- Range of sizes available extending to heights of up to 12.5-metres, allowing for differing applications.
- Base handle of the pole is made from glass fibre to insulate the pole and minimise the danger of electrocution
- Clamp tensions can be adjusted without the need for tools, making the pole easy to extend/collapse
- Carry bag included as standard, to protect the pole when not in use
- Compatible with vast range of camera attachments
- All sizes include a footplate which provides stability and safety when fully extended

Protective Telescopic Pole Carry Bag Included With Each Pole Purchase.

Stable Footplate for Enhanced Safety

This camera footplate kit is a must-have accessory for your pole. It provides a stable base for your pole, even in uneven terrain. The dual purpose hinge folds up for easy storage, as well as still allowing the pole room to tilt and spin. With a quick-release design that makes it easy to attach and detach from your pole.

Product Code	Description	Weight	No. of Sections	Compressed Length	Extended Length
HV3-04-05000-CF	5.4mtr / 18ft Broge Carbon Fibre Camera Pole + Folding Footplate	1400g	4	1550mm	5420mm
